DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 6-13 rejected under 35 U.S.C. 103(a) as being unpatentable over JP-11/152260.

JP'260 discloses a method for the production of amidamine derivatives that exhibit a suitable color stability and fragrance stability over time, wherein an amidamine compound, which was obtained by reacting a prescribed diamine (e.g., an N, N dimethyl-aminopropyl-amine or the like) with a prescribed fatty acid (e.g., a lauric acid or the like), or a lower alcohol ester thereof is combined with a prescribed organ phosphoric acid compound that corresponds to the compounds represented by formula (5) set forth in claims 6-13 of the present application, and then the product therefrom is employed in subsequent reactions (refer to the claims, paragraphs [0001] and [0009], and the examples).

Therein, the abovementioned system, wherein an organophosphoric acid compound is added to an amidamine compound, corresponds to the system set forth in claims 6-13, wherein an organophosphoric acid compound is added subsequent to the reaction or subsequent to the removal of the excess diamines after the reaction.

Art Unit: 1621

In addition, although the content of the organophosphoric acid is expressed in terms of "wt%" units in the inventions set forth in claims 6-13, if the content of the organophosphoric acid in the invention disclosed in document 1 is converted from "mo%" units to "wt%" units then it becomes apparent that the content range disclosed in document 1 overlaps with the specific content range that is set forth in the present application.

Therefore, there cannot be considered to be a significant difference between the inventions in question, it would have been obvious to modify JP'260 to obtain the inventions set forth in claims 6-13.

Allowable Subject Matter

3. Claims 14-21 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Deborah D. Carr whose telephone number is 571-272-0637.
